

JAVA Assignment

Java Assignment 2: Currency Converter

You have been asked to provide a currency exchange converter. A person will be presented with 5 currencies that they can convert to/from US Dollars. The program will allow the user to input the amount of dollars or other currency to be converted.

Allow the user 10 different conversion options. Choose 5 different currencies and look up their exchange rates.(Please document where you found these) Give the user a menu of options to choose from.

For information on how to format the currency amounts nicely, see the cookbook.

NOTE: You MUST have at least Euros and Great Britain Pounds as two of your conversion currencies!!!!

Please comment your code with details of what the various commands you are using accomplish.

Please use the SenezConsole for this project.
