

May

Dear Parents,

It's hard to believe that we only have 33 school days left! We finished studying Habitats and are now into our farm unit! Be on the lookout for some fine motor projects relating to this theme when you walk-about this Friday during the Ice-Cream Social! We will begin our plant unit of study next week and will learn about the things plants need to grow and be healthy. I hope you all enjoyed the special gift the children made for Mother's Day to say thanks for all you do!

In Math this month, we are working on addition and subtraction using a variety of manipulatives. We are also continuing our work on recognizing numbers to 30 and writing numbers to 20.

Here is what's happening this month:

Letters we are working on: Ee & Zz and Digraphs ch, sh, th and wh.

Star Words: look, for, be

Themes: Farms & Plants and at the end of the month we will begin Oceans!

Math Concepts: addition and subtraction. We will also continue to work on counting groups with accurate 1:1 correspondence, recognizing and writing numbers to 30. We will also review telling time to the hour.

Tesago Walk-About & Ice Cream Social, May 13th @ 6:30! See you there!
