

To All Parent and Student Mobile Portal App Subscribers,

ACTION REQUIRED

Infinite Campus has retired the old mobile portal app and there is a new app. You will see it when you try to log into your old mobile portal. You just have to click on the appropriate selection, either Campus Student or Campus Parent. The screen will look like this:

Once you select your portal choice you will need to enter your password to get into the new app. Once you are in, the screen will default to Message Center where you can review district and school messages. To see your information you have to select the next module down the list called "Today" (look for the 3 horizontal bars in top left to get to the menu). From there the portal will look familiar and you can select your student (from the parent app) or you will see your regular screen (from the student app).

Please update your app as soon as possible! If you need password help DON'T wait until AUGUST when schedules are about to be released. We get swamped with portal password reset requests in August and can't guarantee that we will get back to you in a timely manner. Please don't wait! Also, remember that there is a self-service password reset function now. Thank you.
